

# Schedule for Sprint 3

**The Critical Path is identified by the red and bold line**

To complete the sprint in a timely manner, we held a meeting before starting the sprint to discuss task dependencies. We focused on tasks which would lead the project towards completion while trying to minimize dependencies. Tasks with dependencies were split in a way to ensure all members had some sort of independent task to work on allowing everyone to make progress. Furthermore, the team maintained constant communication via discord/slack and daily standups to work on any blockers they might be facing.
